Ek is nie seker wat ons regering tans doen nie. Ek is ook nie baie seker of die regering weet wat hulle tans doen nie. Daar is oomblikke wanneer die wind ophou waai en dit voel asof die wêreld op moedverloer se vlakte is, oomblikke wanneer ons gesamentlik vasgevang word op 'n plek waar die metaforiese gety nie inkom óf uitgaan nie. (Lees verder [hier](#).)

We are once again at the beginning of a new year and the first month of the year is already something of the past! Having said this, we have to realise that we have to value every moment of the year, every month, every day, every hour, every minute, and every second in such a way as to ensure that we don't look back with regret and reproach of what could have been. (Read further [here](#).)

NAMPO-Oesdag 2023

Met lang afwagting en groot opgewondenheid het ons almal van Falcon uitgesien om Nampo 2023 op te rig en voor te berei vir al ons staatmakerkliënte. Ons het werklik die beste uitstalling vir Falcon op Falcon- en Amazone-reeks gehad. Die weer was dié jaar heerlik by Nampo Park en het sodoende 'n goeie opbrengs van besoekers opgelewer. Daar was die bekendstelling van nuwe tegnologie wat nog nie voorheen op die Amazone reeks gesien is nie. Dit was verseker 'n baie opwindende week vir ons om huidige en potensiële klante te bedien. Ons sien uit na 'n nuwe seisoen wat voorlê waar ons vir Falcon- kliënte net die beste diens kan bied. Baie dankie vir ieder en elk se ondersteuning en belangstelling.

Besoek graag jou naaste handelaar vir meer inligting oor ons "#TOUGH" reeks van Falcon- en Amazone-implimente.

NAMPO Harvest Day 2023

With long anticipation and great excitement, we all looked forward to Falcon setting up and preparing Nampo 2023 for all our stalwart customers. We really had the best display for Falcon on the Falcon and Amazone range. The weather was wonderful this year at Nampo Park and thus produced a good return of visitors. There was the introduction of new technology that had not been seen before on the Amazone range. It was certainly a very exciting week for us to serve current and potential customers. We look forward to a new season ahead where we can offer Falcon customers only the best service. Thank you very much for everyone's support and interest.

Please visit your nearest dealer for more information on our "#TOUGH" range of Falcon and Amazone implements.

NEW @ Falcon!!

We are thrilled to announce that Falcon is nearing the launch of an exciting new Flail Mower implement. This cutting-edge implement is a testament to our commitment to innovation while building on the established practicality and robustness of our existing range of Flail Mower products. The long-awaited Offset and Tilt Flail Mower strikes a perfect balance between familiarity and new functionality, ensuring that farmers will experience the best of both worlds.

The technical features of this new Flail Mower have been selected to meet the requirements of farmers in Africa. The first machine in this range will measure 2.1 meters wide, providing an optimal cutting width for a variety of applications, especially the narrow row widths of high value crops near the Cape. It features a retractable cutting offset of 350mm from the hitch centerline, which extends up to 3200mm. This versatility allows operators to reach areas that were previously inaccessible, making it a game-changer for cutting embankments on farms or next to roads. With a tilt range of 65 degrees downward to vertical upward, this implement ensures precise cutting and adaptability to different terrains.

The new Offset and Tilt Flail Mower will be available for purchase in the first half of 2024. Before its official release, however, we will be showcasing a functioning prototype at the Falcon stand during Nampo Cape 2023. Here, farmers and industry professionals will have a chance to inspect the capabilities of our latest Flail Mower firsthand. We are confident that this new addition to our family of implements will deliver the same reliability and no-nonsense ruggedness that Africa has come to expect from Falcon.

NUUT @ Falcon!!

Ons is opgewonde om aan te kondig dat Falcon die bekendstelling van 'n opwindende nuwe Flail Mower-impliment nader. Hierdie impliment is 'n bewys van ons verbintenis tot innovasie terwyl ons voortbou op die gevestigde praktiese en robuustheid van ons bestaande reeks Flail Mower-produkte. Die langverwagte Offset and Tilt Flail Mower skep 'n perfekte balans tussen bekendheid en nuwe funksionaliteit, wat verseker dat boere die beste van twee wêreldes sal ervaar.

Die tegniese kenmerke van hierdie nuwe Flail Mower is gekies om aan die vereistes van boere in Afrika te voldoen. Die eerste masjien in hierdie reeks sal 2,1 meter wyd meet, wat 'n optimale snywydte bied vir 'n verskeidenheid toepassings, veral die nou rywydtes van hoëwaarde-gewasse naby die Kaap. Dit beskik oor 'n intrekbare snyverskuiwing van 350 mm vanaf die koppelmiddellyn, wat tot 3200 mm strek. Hierdie veelsydigheid stel operateurs in staat om gebiede te bereik wat voorheen ontoeganklik was, wat dit 'n spelwisselaar maak om walle op plase of langs paaie te sny. Met 'n kantelbereik van 65 grade afwaarts na vertikaal opwaarts, verseker hierdie impliment presiese sny en aanpasbaarheid by verskillende terreine.

Ons hoop dat die nuwe Offset- en Tilt Flail Mower in die eerste helfte van 2024 te koop sal wees. Voor die amptelike vrystelling daarvan sal ons egter 'n funksionerende prototipe by die Falcon-stalletjie tydens Nampo Kaap 2023 ten toon stel. Hier sal boere en professionele persone in die bedryf 'n kans kry om die vermoëns van ons nuutste Flail Mower eerstehands te inspekteer. Ons is vol vertroue dat hierdie nuwe toevoeging tot ons familie van implimente dieselfde betroubaarheid

en geen-nonsens robuustheid sal lewer as wat Afrika van Falcon verwag.

It is with sadness and regret that we announce the passing of our colleague and friend, Rob Schmidt, Financial Manager for Falcon and Staalmeester. He became a good friend to many during his time at Falcon and Staalmeester and he will be sorely missed by all employees. We wish the Schmidt family comfort, courage, peace and lots of love during this difficult time. You will be missed. #RIP ❤️

AMAZONE's story (click [here](#) to read)

myAMAZONE

myAMAZONE for farmer

Digitalisation offers numerous opportunities in the way that they can optimise their relationship with their customers. AMAZONE wants to take advantage of these opportunities via its new customer portal, **myAMAZONE**.

With **myAMAZONE** they want to create new digital contact options that offer their common customers a range of more targeted services and this means that it is important for their sales and service partners to be involved in the process from the very beginning.

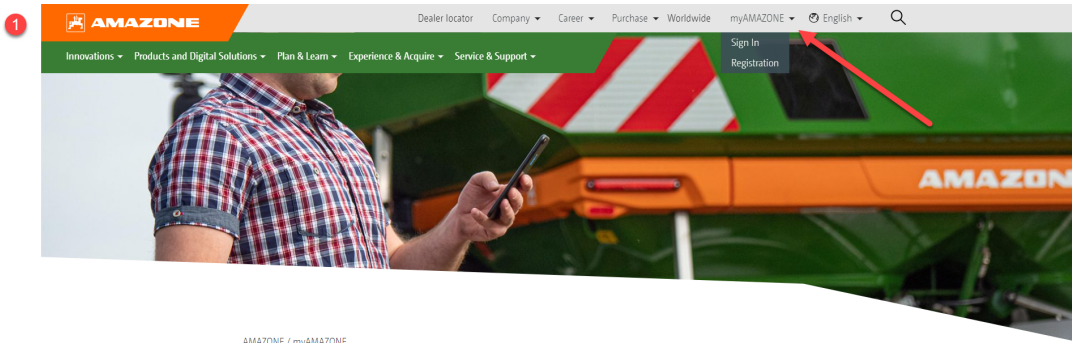

For the launch, myAMAZONE will offer three main services to the owners of AMAZONE agricultural and ground care machinery:

- 1.** An overview of all relevant information such as machine setting charts, operator manuals and maintenance procedures based on the machine serial number.
- 2.** A manufacturer's guarantee of 24 months, which increases the customer's protection for the machine by one year to a total of 24 months after installation of the machine.
- 3.** A new 7-year guarantee against perforation corrosion for customers owning ZA-V and ZA-TS mounted spreaders and ZG-TS trailed spreaders.

These additional guarantees can be applied for within the contractual warranty period of 12 months after installation of that agricultural or ground care machine with the farmer. This also applies retrospectively to AMAZONE machines already purchased which are still within the 12-month contractual warranty period. The important point is that the guaranteed application is only possible if the farmer has successfully linked up with you. The registration and the guarantee offer are free of charge for the farmer.

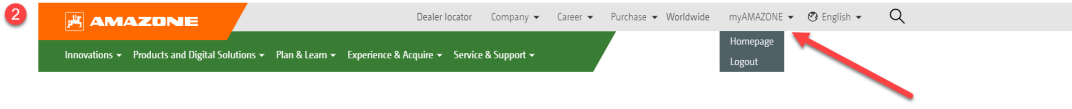

Farmers will be able to register by scanning the QR code on these stickers which will be affixed to the implements. To have a look at what to expect, click on this link to understand the process better: <https://amazone.net/en/myamazone/registration>
