Genade onbeskryflik groot

So staan ons weereens aan die begin van 'n nuwe jaar met nuwe uitdagings, geleenthede, mense, seisoene en voorregte. Deur genade word dit aan ons geskenk om ook hierdie jaar na die beste van ons vermoë te presteer en om voluit te leef. (Lees verder [hier](#).)

Indescribable grace

Here we are, once again at the start of a new year with new challenges, opportunities, people, seasons and privileges. Through grace we are given another year to perform to the best of our abilities and live life to the fullest. (Read further [here](#).)

NAMPO Kaap 2023

Reën, wind en NAT! Dit was vanjaar ons ervaring by Nampo Kaap. (Dankie tog daar was EEN dag van son sodat ons kon kiekies neem!) Maar tog, ons staatsmaker kliënte het ons beïndruk deur dit tot by ons staanplek te maak, deur die modder, ysige reën en wind.

Daar was die bekendstelling van ons nuwe 'Offset and Tilt Flail Mower' en meer daaroor kan in die volgende stukkie nuus hierna gelees word.

Klem was ook vanjaar op die myAmazon for Farmer registrasie-blad gelê, en meer kan daaroor kan later in hierdie nuusbriëf gelees word.

Baie dankie vir ieder en elk se ondersteuning en belangstelling en ons sien uit na Nampo Kaap 2024.

Besoek graag jou naaste handelaar vir meer inligting oor ons reeks van Falcon- en Amazone-implemente.

NAMPO Cape 2023

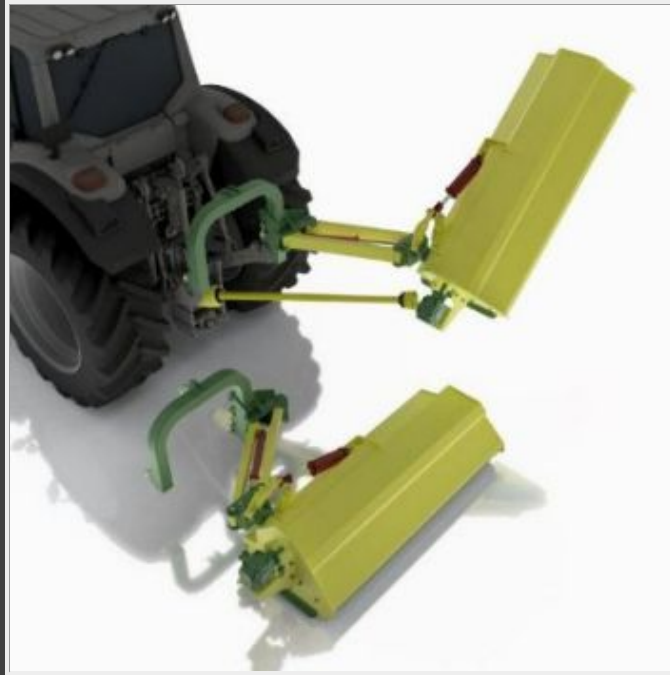

Rain, wind and WET! This was our experience at Nampo Cape this year. (Thank goodness there was ONE day of sun so we could take pictures!) But still, our stalwart customers impressed us by making it to our stand, through the mud, freezing rain and wind.

There was the launch of our new 'Offset and Tilt Flail Mower' and more about it can be read in the next piece of news after this.

Emphasis was also placed on the myAmazon for Farmer registration page this year, and more can be read about it later in this newsletter.

Thank you very much for everyone's support and interest and we look forward to Nampo Cape 2024.

Please visit your nearest dealer for more information on our range of Falcon and Amazone implements.

NEW @ Falcon!!

We are thrilled to announce that Falcon is nearing the launch of an exciting new Flail Mower implement. This cutting-edge implement is a testament to our commitment to innovation while building on the established practicality and robustness of our existing range of Flail Mower products. The long-awaited Offset and Tilt Flail Mower strikes a perfect balance between familiarity and new functionality, ensuring that farmers will experience the best of both worlds.

The technical features of this new Flail Mower have been selected to meet the requirements of farmers in Africa. The first machine in this range will measure 2.1 meters wide, providing an optimal cutting width for a variety of applications, especially the narrow row widths of high value crops near the Cape. It features a retractable cutting offset of 350mm from the hitch centerline, which extends up to 3200mm. This versatility allows operators to reach areas that were previously inaccessible, making it a game-changer for cutting embankments on farms or next to roads. With a tilt range of 65 degrees downward to vertical upward, this implement ensures precise cutting and adaptability to different terrains.

The new Offset and Tilt Flail Mower will be available for purchase in the first half of 2024. Before its official release, however, we will be showcasing a functioning prototype at the Falcon stand during Nampo 2024. Here, farmers and industry professionals will have a chance to inspect the capabilities of our latest Flail Mower firsthand. We are confident that this new addition to our family of implements will deliver the same reliability and no-nonsense ruggedness that Africa has come to expect from Falcon.

NUUT @ Falcon!!

Ons is opgewonde om aan te kondig dat Falcon die bekendstelling van 'n opwindende nuwe Flail Mower-implement nader. Hierdie implement is 'n bewys van ons verbintenis tot innovasie terwyl ons voortbou op die gevestigde praktiese en robuustheid van ons bestaande reeks Flail Mower-produkte. Die langverwagte Offset and Tilt Flail Mower skep 'n perfekte balans tussen bekendheid en nuwe funksionaliteit, wat verseker dat boere die beste van twee wêreldes sal ervaar.

Die tegniese kenmerke van hierdie nuwe Flail Mower is gekies om aan die vereistes van boere in Afrika te voldoen. Die eerste masjien in hierdie reeks sal 2,1 meter wyd meet, wat 'n optimale snywydte bied vir 'n verskeidenheid toepassings, veral die nou rywydtes van hoëwaarde-gewasse naby die Kaap. Dit beskik oor 'n intrekbare snyverskuiwing van 350 mm vanaf die koppelmiddellyn, wat tot 3200 mm strek. Hierdie veelsydigheid stel operateurs in staat om gebiede te bereik wat voorheen ontoeganklik was, wat dit 'n spelwisselaar maak om walle op plase of langs paaie te sny. Met 'n kantelbereik van 65 grade afwaarts na vertikaal opwaarts, verseker hierdie implement presiese sny en aanpasbaarheid by verskillende terreine.

Ons hoop dat die nuwe Offset- en Tilt Flail Mower in die eerste helfte van 2024 te koop sal wees. Voor die amptelike vrystelling daarvan sal ons egter 'n funksionerende prototipe by die Falcon-stalletjie tydens Nampo 2024 ten toon stel. Hier sal boere en professionele persone in die bedryf 'n kans kry om die vermoëns van ons nuutste Flail Mower eerstehands te inspekteer. Ons is vol vertroue dat hierdie nuwe toevoeging tot ons familie van implemente dieselfde betroubaarheid en

In solidarity with our Boks!

myAMAZONE for farmer

Digitalisation offers numerous opportunities in the way that they can optimise their relationship with their customers. AMAZONE wants to take advantage of these opportunities via its new customer portal, **myAMAZONE**.

With **myAMAZONE** they want to create new digital contact options that offer their common customers a range of more targeted services and this means that it is important for their sales and service partners to be involved in the process from the very beginning.

For the launch, myAMAZONE will offer three main services to the owners of AMAZONE agricultural and ground care machinery:

- 1.** An overview of all relevant information such as machine setting charts, operator manuals and maintenance procedures based on the machine serial number.
- 2.** A manufacturer's guarantee of 24 months, which increases the customer's protection for the machine by one year to a total of 24 months after installation of the machine.
- 3.** A new 7-year guarantee against perforation corrosion for customers owning ZA-V and ZA-TS mounted spreaders and ZG-TS trailed spreaders.

These additional guarantees can be applied for within the contractual warranty period of 12 months after installation of that agricultural or ground care machine with the farmer. This also applies retrospectively to AMAZONE machines already purchased which are still within the 12-month contractual warranty period. The important point is that the guaranteed application is only possible if the farmer has successfully linked up with you. The registration and the guarantee offer are free of charge for the farmer.

Farmers will be able to register by scanning the QR code on these stickers which will be affixed to the implements. To have a look at what to expect, click on this link to understand the process better: <https://amazone.net/en/myamazone/registration>

Contact your Regional Sales Manager for any other enquiries.

Falcon Wellness Day 2024

Falcon's annual Wellness run/walk was a great success this year.

The logo's design this year represented the following:

The human figure represents physical activity.

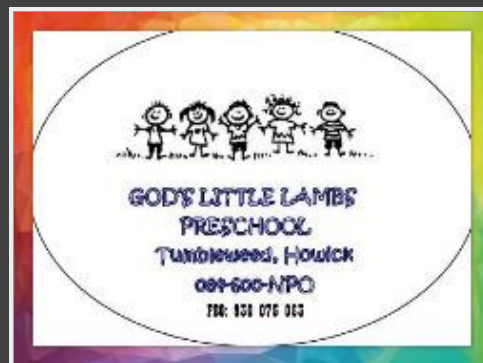

The circle reminds us of flexibility, wholeness, and perfection.

The leaves represent growth, renewal, and energy.

Let's remember to be kind to ourselves and make every day great ♥.

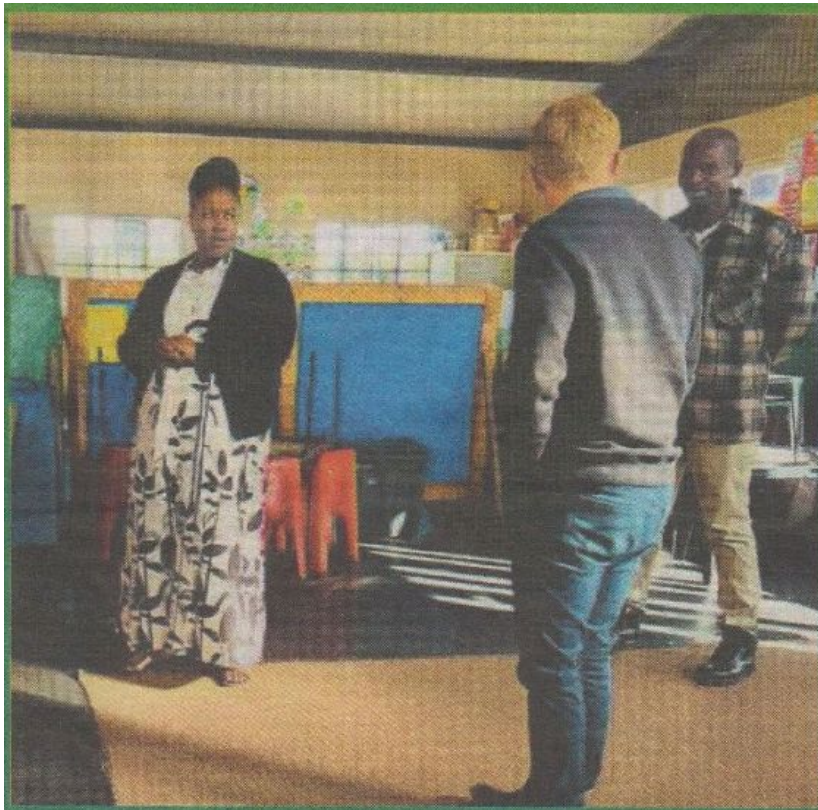

Beskerm die Lammertjies *Protect the Lambs*

***A school is a building which has four walls with tomorrow inside.
Let us save the future.***

Below are photos of reinforcements welded into position on all vulnerable windows after petty thieving at God's Little Lambs Preschool. Hope they will feel safer now :)

Monica Ngobese, the principal of God's Little Lambs, is pictured with uMngeni Mayor Chris Pappas and Pastor Nathi Nobela.

It takes a village...

The saying goes "It takes a village to rear a child" and that's exactly how our community works: fruit from a local farmer, meat from one of the local butcheries, playground equipment and ride-on scooters, bookcases, material to make winter clothing, jerseys and beanies and cash donations are just some of the items that our very generous Midlands residents (and beyond) have given to God's Little Lambs Pre-school in the past couple of months.

We would particularly like to mention Falcon Equipment, who responded promptly to our need to make our school more secure by welding and installing new burglar bars for us, free of charge.

Thank you one and all – we could not survive without your help.

On that note, uMngeni Mayor, Chris Pappas, recently paid a sur-

prise visit to several pre-schools, including God's Little Lambs, and announced that the municipality is investing R100 000 in the new budget to assist local early childhood development centres and pre-schools with equipment and other requirements.

Another exciting development is our acceptance as distributors of children's books by the amazing Book Dash team. Their aim is to get as many books as possible into communities in their home languages.

We look forward to distributing our first consignment for our children to take home in the near future.

For more information on God's Little Lambs Preschool go to <https://gods-little-lambs.wixsite.com/gllhowick> or contact Clare Van Daele at 084 455 7771 if you would like to help.
