Suid-Afrika – interessante tye!

So staan ons alweer in die helfte van nog 'n jaar. Jy het skaars jou oë geknip en nog 'n minuut, nog 'n uur, nog 'n dag, week en maand is verby. Staan ons stil, so in die middel van ons winter maande, en vra vir onself waar die tyd heen gegaan het? Wat het ek gedoen of bereik en waar het ek 'n verskil gemaak? (Lees verder [hier](#).)

South Africa – interesting times!

We are halfway through another year. You've hardly blinked and another minute, another hour, another day, week, and month has passed. Do we stop, in the middle of our winter months, and ask ourselves where the time has gone? What did I do or achieve and where did I make a difference? (Read further [here](#).)

NAMPO Bothaville 2024

"Gou het die voete van die Falcon-span gevoel soos die verslete bande van 'n ou Toyota Hilux."

NEW @ Falcon!!

The **Falcon F2250 Bale Grab** forms part of a large range of universal implements intended for material handling applications around the farm. With a height of 2.1 meters between the lower and upper tines, it boasts the capacity for 3 x 750 kg Big Pack bales in one grab for more efficient material handling.

Attachment options are available for either Wacker Neuson or JCB telehandlers, which makes the Falcon F2250 Bale Grab a truly versatile addition to the material handling capabilities of any farm.

NUUT @ Falcon!!

Die **F2250 Falcon Bale Grab** vorm deel van 'n groot reeks universele implemente wat bedoel is vir materiaalhanteringstoepassings. Met 'n hoogte van 2,1 meter tussen die onderste en boonste tande, spog dit met die kapasiteit vir 3 x 750 kg Big Pack-bale in een gryp.

Met 'n herontwerpte skarniermeganisme om slytasie te verminder, en opsies vir aanhegting aan óf Wacker Neuson of JCB telehanteerders, is die Falcon F2250 Bale Grab jou ideale baalhanteringsoplossing.

ZA-TS 5000 Mounted Spreader

- More efficient than ever -

Amazone has extended its mounted spreader product range with the ZA-TS 5000. The ZA-TS product range has stood for maximum performance with the highest precision since its introduction. Precise spread patterns up to 54 m with application rates of 650 kg/min are the key to this. While capacities of up to 4,200 l were previously possible, the new hopper capacity of up to 5,000 l further increases the maximum area output.

Increased efficiency

The increase in capacity of 800 l reduces the number of filling operations, thereby simplifying the logistics. The large hopper capacity of the mounted spreader can be used to the full, especially when using lightweight spreading materials such as urea. The number of journeys between the field and yard can be reduced and the increasingly shorter time windows for the spreading are optimally utilised. Efficient, needs-based fertilisation is therefore guaranteed.

The integration of the Profis weighing system enables the optimum loading. Intelligent solutions such as WindControl and ArgusTwin are also available

The compact tractor mounting provides optimum weight distribution, even with heavy payloads

Use the full potential

The ZA-TS 5000 comes with the Ultra frame and the Profis weighing system as standard. The intelligent integration of the Profis weighing system in the ISOBUS software enables the user to monitor fill levels and residual volumes, define target weights and fill precisely at any time. The maximum payload of 4,500 kg is utilised in full without running the risk of overloading the spreader.

- **Increased efficiency**
Make the best use of fertilisation windows
- **Use the full potential**
Fill precisely and avoid empty trips

ZG-TX – New trailed combi spreader without compromise

Flexible – Precise – High-performance

AMAZONE sets new standards in the combi spreader sector with the new trailed ZG-TX. Both granular mineral fertilisers and earth-moist limes can be applied precisely through the one machine by means of a simple conversion between the TS spreading system and the newly developed spreading unit for lime. The ZG-TX therefore combines the advantages of the TS spreading system, with its disc-integrated AutoTS for optimum border spreading results, with maximum efficiency in spreading lime. With the simple Special frame and the stronger Super frame, **AMAZONE** offers the right machine for any application.

NEW AMAZONE Tyrok & Cayros Plough

**TYROK semi mounted
reversible plough**

**CAYROS mounted
reversible plough**

NEW available from Falcon Top performance on any soil type

AMAZONE now offers the Tyrok 400 semi-mounted reversible plough, with unique advantages for your farm. Maximum speed with minimum wear – all thanks to the new SpeedBlade plough bodies. The new models are offered with a choice of six to nine furrows for tractors of up to 400 hp. The new sturdy, rectangular profile beam ensures a constant working depth over the full width.

With the Cayros plough range, **AMAZONE** offers a mounted plough in two to six furrows. With a comprehensive range of optional equipment available, **AMAZONE** ploughs always provide the right solution for any type of application, even under diverse conditions.

Contact your Regional Sales Manager for any other enquiries.

En wat nog?

And what else?

Falcon supported the CHOC foundation by joining in on their Flip Flop day held in February. Standing together, shoulder to sole with Flippie by buying stickers for **R10** so that the brave children and teenagers of **CHOC Childhood Cancer Foundation South Africa** will never stand alone again in their **fight against childhood cancer!** ♥.

What is CHOC?

Childhood Cancer Foundation SA

A non-profit organisation that advocates for the health and well-being of children and teenagers diagnosed with cancer or life-threatening blood disorders and their families.

The passionate and dedicated staff and volunteers of CHOC aim to save lives through early detection and comprehensive support programmes for the families affected by cancer.

We offer, psychosocial, emotional and practical support as we augment the different medical fraternities.
