EXPERIENCE

Over 30 years of designing, manufacturing, importing, distributing and selling a wide range of agricultural implements for the South African farmers varied needs

CUSTOMER SERVICE

Our supportive, professional, efficient and fast customer service is what our 31+ years of business is built on

ECONOMIC

Built specifically for the local South African farmer by South African's. No exchange rates or import duties.

DESIGN

Simple
Safe
Serviceable
Built-to-last

LOCAL

Made for South Africa's tough conditions. Readily available spare parts and excellent customer service

OUR VALUES

Honesty
Trust
Respect
Integrity

FALCON AGRICULTURAL EQUIPMENT (PTY) LTD

Falcon Agricultural Equipment (Pty) Ltd is the largest manufacturer of rotary cutters in Africa. The company opened its doors in 1985, at its current premises in Howick, KwaZulu-Natal, South Africa. We manufacture the Falcon and Locust ranges of implements as well as importing a range of implements that complement the locally produced ones.

We have built long-standing relationships with our dealers and their customers, based on honesty, trust, respect and integrity. Excellent customer service is an important part of the Falcon promise.

F1000 Uniloader® with spike attachment, swivel hook, cruciform and control valve	1000	4,5	678
JCB Q-Fit® Attachments			
JCB Q-Fit® Bale Fork	750	-	95
JCB Q-Fit® Bag Handler	1000	-	170
* Varies depending on the tractor size			

AFFORDABLE AND VERSATILE

Falcon Material Handling Implements offer a wide range of benefits making them extremely versatile, useful and affordable on any farm. They are built on the Falcon principles of being **TOUGH**, **RELIABLE** and **DURABLE**, ensuring THAT you have an implement that is **BUILT TO LAST**.

MATERIAL HANDLING

The Falcon range of material handling implements can transport, load, unload and stack various materials and items of up to 1 000 kg and lift them to a height of 4,5 m, depending on the size of the tractor.

BALE HANDLING EQUIPMENT

AFFORDABLE LIFTING, LOADING AND TRANSPORTING

THE FALCON BALE FORK

- Low-cost implement
- In-field loading of hay bales
- Transportation to the bale storage area
- Maximum weight: 750 kg

THE FALCON BALE FORK-LOADER

- Used to stack hay bales in the storage area
- Maximum weight: 500 kg
- Maximum lift height to the centre of the bale is 2,7 m and varies depending on the tractor size

Important note: The bale fork loader should not be used as a transporter as this could result in damage to the loader and possibly early failure. The bale fork should be separated from the loader when used to transport bales.

JCB Q-FIT® ATTACHMENTS

Developed specifically for farmers who use the popular JCB Q-fit® system. The Q-fit® system is unique to JCB and offers fast fitting and quick and easy changeover of attachments.

JCB Q-Fit® Bale Fork

JCB Q-Fit® Bag Handler

THE FALCON UNILOADER®

RELIABLE, EFFICIENT AND COST-EFFECTIVE SUBSTITUTE FOR FRONT-END LOADERS

THE FALCON UNILOADER®

- Extremely versatile implement
- Loads and stacks both round and square bales
- General loading and lifting jobs around the farm
- Unique design allows the Uniloader® to transport bales and other items around the farm - the mast is simply lowered to rest on the support brackets, and the tractor linkage then raises the Uniloader® so that the item is clear of the ground
- The standard two-spool valve fitted to most modern tractors operates the lifting and levelling cylinders (necessary operating valves can be supplied for older tractors)
- Fitted with telescopic legs and can be parked freestanding and ready to be easily hitched to the tractor when required

The Falcon F750 Uniloader®

- Can lift up to 750 kg to a height of 3,4 m, depending on which tractor is used
- Capable of loading bales two high on a trailer or stacking them three to five high on the ground, depending on their size
- Used for the general lifting and movement of items, for example: lifting and moving of drums, placing pipes into ditches and moving machinery

The Falcon F1000 Uniloader®

- Can lift up to 1 000 kg to a height of 4,5 m depending on which tractor is used

Three attachments for different applications:

1. the cruciform for lifting bulk bags, e.g.: fertiliser bags
2. the fork attachment for hay bales
3. the swivel hook for general lifting tasks
