

# JF 1150 AT Forage Harvester

Finance  
Available

The JF 1150 AT is the farmers' favorite solution for harvesting sugar cane, tropical grasses and for using higher power tractors.

## FEATURES

- Wider row-independent header with front drums, gathering platform, and aligners with an exclusive design for constant harvesting flow and lower stress for transmission. In maize & sorghum it harvests 3 rows at a time with row spacing of 45 cm; and 2 rows at a time with row spacing of 90 cm.
- Heavy-duty transmission calculated for tough jobs, featuring special gearboxes.
- Extra-sized gathering platform with 4 drums and spring-loaded drum for more precise chopping, as well as a central lubrication system for quicker maintenance.
- 16 extra-sized "C" technology rotor blades for higher processing power and chopping precision with built-in sharpener.
- 12 chop sizes available with easy shifting, perfect for working in various forage, harvesting, and dry matter conditions.

## Staalmeester

## SPECIFICATIONS:

Capacity	Up to 42 ton/h <sup>2</sup>
Cut sizes	12 (3—21 mm)
Working width	1,20m <sup>1</sup>
Number of blades	16
Required power at PTO	85 up to 130 hp
Required revolution at PTO	540 rpm
Approximate Weight	1312 kg
Linkage type	cat II
Drive	Tractor PTO
Transmission system	Gearbox/cardan

<sup>1</sup>Productivity might vary and depends on the following factors: cut size; productivity of forage per hectare; tractor power; logistic capacity (wagons) for forage transportation. Before acquiring the equipment, please talk to your dealer about the size of your tractor tire.
