

JF 3200 AT Forage Harvester

Finance
Available

JF 3200 AT multi-forage harvester is the ultimate solution from JF for fast harvesting of forage crops and also ideal for forage harvesting contractors. With a wide header of 3,2m for higher productivity, it allows harvesting of several kinds of forage no matter the distance between rows or direction, substantially increasing the output.

It's coupling to reverse-drive tractors makes the machine work in line with the tractor, offering better manoeuvrability and compactness if compared to trailed models, with driving experience similar to a self-propelled unit.

ADVANTAGES, FEATURES AND BENEFITS

- Reverse system gearbox for unblocking machine when overloaded;
- 8 independent shear pin devices for machine protection against overloading;
- Modular design for simple maintenance;
- Hydraulic control system with precise and comfortable joystick; and
- Built-in sharpener for fast and precise maintenance of blade sharpness.

Staalmeester

SPECIFICATIONS:

Capacity	Up to 90 ton/h*
Cut sizes	18 (2,5–34 mm)
Number of rotors	2
Number of blades in each rotor	15
Power source	Tractor P.T.O
Number of gathering drums	8
Recommended PTO power	140–200 kW
Required PTO revolution	1000 rpm
Weight	3900 kg
Transmission system	Cardan & gearbox
