Spreaders line
JF, the solution for the farmer!

SPREADERS LINE

JF Double Disc 1300 is a spreader for fertilizers, seeds and lime. Besides being an economical solution for broadcasting material with a range from 16 to 36m, the adjustment in the angle of paddles makes possible a more uniform distribution and allows working in small areas due to its independent spreading system (with only one disc), making it easy spreading on edges.

With capacity for 1300 liters and quick adjustment of rate by limiting auger and scale indicator on cylinder, JF Double Disc 1300 is a light equipment with low power consumption without losing efficiency in the uniform distribution of granular fertilizer, lime and seeds.

TECHNICAL FEATURES	JF Double Disc 1300
Power source	tractor PTO
Height	1300mm
Load capacity	1300 liters
Length	1500mm
Width	2350mm
Working width (range)	16 to 36 meters
Required power at PTO	30 cv
Required revolution at PTO	540 RPM
Weight	274 kg
Capacidade de levante do trator	1800 kg

Advantages

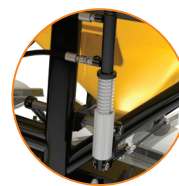

- Each disc has 4 paddles with a special design for homogeneous throwing in fan shape, covering a range from 16 to 36 m;
- Discs, protectors, gates and lower lid made of stainless steel
- Working on edges: independent spreading system where fertilizer can be broadcast in only one side;
- Sealed oscillating shaker causes less damages on products and has lower maintenance;
- Easy to adjust rate changing the limiting auger and the scale indicator on hydraulic cylinder;
- Hopper built in polyethylene resistant to oxidation, easy to clean and to maintain. Protection grids built in polyamide and glass fiber.

·Protecting grid made of polyamide and glass fiber and hopper made of polyethylene

·Discs with 4 paddles each; range of 16 to 36m

·Quick adjustment of paddle angle

Technical description: Double disc spreader with capacity of 1300 liters, tractor driven, steel frame, discs, protectors, gates and lower lid made of stainless steel, hopper made of polyethylene, gride made of polyamide and glass fiber, equipped with disc with 4 paddles each, paddles with adjustable angles, range from 16 to 36 meter, shaker with cone, special shaker for lime (optional), rate control, independent broadcast system, driving by PTO shaft. Power required of 30hp and revolution required of 540 rpm on PTO.
