Notice

Senwes Limited (Senwes) hereby gives notice of the storage options and tariffs which will apply for the 2024/2025 sunflower marketing year, which will start on 1 March 2024.

This notice and circular must be read in conjunction with Senwes standard storage conditions (available at all silos) form the total agreement in terms of which you may make use of the storage facilities. Should any terms and conditions contained herein be contrary to the standard terms applicable to the storage of products, the provisions of this notice shall apply. Any options selected shall apply in respect of the relevant season only.

Nothing contained herein shall be interpreted that Grain silo Operator ('Senwes') is obliged to accept any or all products offered by the Grain Silo User for storage thereof. Acceptance of product for storage purposes shall at all relevant times be at the sole discretion of Senwes, who shall exercise its discretion on the basis of, inter alia, its own requirements, the availability of storage space or the functionality of a specific silo.

Senwes reserves the right to change the tariffs during the year if operational circumstances require it. Such tariffs will be applicable from the date that same is published by Senwes.

Amended administrative and sundry tariffs for the period 1 May 2024 – 30 April 2025 will be published at a later stage in the summer grain tariff letter. Amended tariffs are applicable from 1 May 2024.

*** The recovery of statutory levies is Including VAT, as required by legislation.**

*** ALL TARIFFS EXCLUDE VAT (VAT IS PAYABLE ON ALL TARIFFS)**

General storage:

These are the standard storage tariffs applicable should you not select any of the other storage options.

1. HANDLING COSTS

1.1. Handling costs for 2024 - 2025 season:

	Handling per tonne
General Storage (Category A silos)	R133.85 (Excluding VAT) R153.93 (Including VAT)
General Storage (Category B silos)	R88.66 (Excluding VAT) R101.96 (Including VAT)
General Storage (Category C silos)	R59.50 (Excluding VAT) R68.43 (Including VAT)

2. STORAGE COSTS

2.1. Day tariff costs for 2024 – 2025 season:

	Day tariff per tonne
Category A silos	R2.31 (Excluding VAT)per Tonne per day R2.66 (Including VAT) per Tonne per day
Category B silos	R2.25 (Excluding VAT) per Tonne per day R2.58 (Including VAT)per Tonne per day
Category C silos	R2.25 (Excluding VAT)per Tonne per day R2.58 (Including VAT)per Tonne per day

This storage tariff is payable monthly, unless prior financing arrangements have been made with Senwes, in which case the sunflower will serve as security. The costs in respect of this tariff option shall be invoiced upon delivery or transfer of the sunflower to this option and shall be payable within 30 days of monthly statement, whereafter interest at the current **ABSA prime lending rate** shall be charged from the date upon which the amount was payable until date of payment.

2.2. Season tariff costs for 2024 – 2025 season:

	Season tariff per tonne
Category A silos	R284.13 per tonne (Excluding VAT) R326.75 per tonne (Including VAT)
Category B silos	R272.25 per tonne (Excluding VAT) R313.09 per tonne (Including VAT)
Category C silos	R270.00 per tonne (Excluding VAT) R310.50 per tonne (Including VAT)

The following volume discount shall be applicable in respect of the **season tariff**:

Tonnage	%
2000 to 7000	7.5% of storage costs
7000 and higher	10.0% of storage costs

Please take note of the following amendments and additions:

- Volume discount shall be given at the end of the season.
- Volume discount shall only be applicable to oilseeds delivered or converted to season tariff.
- The client must **select their option in writing at the silo or at the Senwes head office** in order to make use of this option.
- Invoicing will take place within 7 (seven) days after selection of the option, and the aforementioned invoice will be payable within 30 (thirty) days from date of invoice, subject to **interest being levied at the current prime lending rate of ABSA** in accordance with the general storage conditions in respect of any storage costs not paid on time.
- The relevant handling tariff per Tonne shall be debited together with the season storage tariff and shall be payable on or before 30 (thirty) days of date of invoice.
- Rights in terms of the **seasonal storage option** are not transferable should stock be transferred from one client to another.
- Where stock is transferred from a Buyer's portfolio to the Buyer's financing folio, rights will be transferable.
- **Please note:** Should stock be transferred from a day tariff to season tariff, both tariffs will apply as indicated in the tariff document.
- Clients are requested to plan properly in respect of storage options selected as no credit will be granted passed in respect of the season tariff should sunflower be sold or outloaded before the end of the season.
- This option only applies in respect of sunflower held on a stock account. Should a client holding sunflower by virtue of a silo certificate (Safex or Senwes) want to make use of this option, the silo certificate must be cancelled, and the sunflower tonnage must be placed on a stock account.
- The administrative costs for such a transfer amount to R4.75 per tonne (Excluding VAT) and R5.46 per tonne (Including VAT), subject to a minimum amount of R104.09 (Excluding VAT) and R119.70 (Including VAT) per transaction. Senwes Grainlink reserves the right to change the silos where the option applies at any time, which decision will be made based on business considerations at Senwes Grainlink's own discretion. Where grain has already been delivered, transaction will be honoured.

Silos where sunflower will be received:

The following silos have been registered at Safex for the receipt of sunflower:

Category A			Category B	Category C
Allanridge Silo	Hoogte Silo	Schuttendraai Silo	Amalia Silo	Bamboesspruit Silo
Arlingtonne Silo	Koppies Silo	Steynsrust Silo	Bloemhof Silo	Christiana Silo
Attie Silo	Losdoorns Silo	Theunissen Silo	Hallatshope Silo	Leeudoringstad Silo
Bloemfontein Silo	Makokskraal Silo	Tierfontein Silo	Hertzogville Silo	
Bothaville Silo	Melliodora Silo	Van Tonneder Silo	Hoopstad Silo	
Brandfort Silo	Middelvlei Silo	Ventersdorp Silo	Kameel Silo	
Buckingham Silo	Mirage Silo	Vierfontein Silo	Kingswood Silo	
Bultfontein Silo	Mooigeleë Silo	Viljoenskroon Silo	Makwassie Silo	
De Brug Silo	Oberholzer Silo	Vredefort Silo	Migdol Silo	
Enselspruit Silo	Odendaalsrus Silo	Weiveld Silo	Schweizer-Reineke Silo	
Geneva Silo	Petrusburg Silo	Welgeleë Silo	Strydpoort Silo	
Gottenburg Silo	Potchefstroom Silo	Werda Silo	Wolmaransstad Silo	
Groenebloem Silo	Protespan Silo	Wesselsbron Silo		
Hartbeesfontein	Raathsvlei Silo	Willemsrust Silo		
Heilbron Silo	Regina Silo	Winburg Silo		
Hennenman Silo	Rooiwal Silo	Wolwehoek Silo		
Heuningspruit Silo	Schoonspruit Silo			

2.3. DEFERRED STORAGE (first delivery only)

Clients have until 31 October 2024 to select a storage option. During the period until 31 October 2024 the debiting of handling and storage fees will be deferred, unless determined differently in terms of the provisions of a specific option. Clients will be invoiced on 31 October 2024. The client must put his **choice in writing at the silo or at Senwes head office** to make use of this option.

Should sunflower delivered on the deferred storage option be sold on or before 31 October 2024, the handling and accumulated storage fees as at date of the transaction will be accounted by Senwes and such fees will be payable before the sunflower is outloaded or before a silo certificate, as requested by the client, is issued.

Should the client neglect to select a storage option of his choice before 31 October 2024, the following tariffs will automatically be levied.

	Season tariff per tonne
Category A silos	R284.13 per tonne (Excluding VAT)
	R326.75 per tonne (Including VAT)
Category B silos	R272.25 per tonne (Excluding VAT)
	R313.09 per tonne (Including VAT)
Category C silos	R270.00 per tonne (Excluding VAT)
	R310.50 per tonne (Including VAT)

The handling tariff, as referred in paragraph 1, will automatically be levied. In such an event payment must be made within 30 days from date of invoice.

3. SAFEX TARIFF

The tariff relating to this option will apply to all sunflower held by virtue of a Safex silo certificate, subject to the following additional terms and conditions and clients must take note of the fact that the Safex tariff will only apply to sunflower at Safex registered silos.

- 3.1 The Safex tariff as published by Safex (Johannesburg Stock Exchange, Agricultural Derivatives Market) is automatically levied by the system, from the date on which the silo certificate is issued until the date on which the certificate is presented to Senwes.
- 3.2 Sunflower will not be outloaded until all outstanding accumulated costs have been paid.
- 3.3 When a Safex silo certificate is requested and issued, the accumulated silo cost must be paid immediately in accordance with the applicable silo cost option up to the date before the certificate is issued.
- 3.4 The client is entitled to, at any time and in consultation with Senwes, convert the Safex silo certificate tendered to client storage and to select other storage options which may apply. The administrative costs for such a conversion shall be R4.75 per tonne (Excluding VAT) and R5.46 per tonne (Including VAT), subject to a minimum amount of R104.09 (Excluding VAT) and R119.70 (Including VAT) per transaction.

4. SENWES SILO CERTIFICATES

- 4.1 The Senwes general storage tariffs as described in paragraph 2.1 shall be charged automatically by the system from the date upon which the silo certificate is issued until the date upon which the certificate is tendered at Senwes.
- 4.2 When a Senwes silo certificate is issued, the accumulated silo costs, in accordance with the silo storage option which applied until such date must be paid prior to such certificate being issued.
- 4.3 The client is entitled to, in collaboration with Senwes, convert the certificate tendered to client storage and to a storage option as selected by the client, in respect of which other tariff structures may apply. The administrative costs for the conversion will amount to R4.75 per tonne (Excluding VAT) and R5.46 per tonne (Including VAT), subject to a minimum amount of R104.09 (Excluding VAT) R119.70 (Including VAT) per transaction.

Sunflower will not be outloaded before all outstanding accumulated costs are paid.

5. CARRY-OVER STOCK

The storage tariff applicable to all sunflower stock carried over from the season in which it was delivered into Senwes silos on the carry-over date defined below, shall be the day storage tariff as described in paragraph 2.1 above, which tariffs shall apply until the accumulated amount in respect of day storage breaks even with the tariff set out below:

	Season tariff per tonne
Category A silos	R284.13 per tonne (Excluding VAT) R326.75 per tonne (Including VAT)
Category B silos	R272.25 per tonne (Excluding VAT) R313.09 per tonne (Including VAT)
Category C silos	R270.00 per tonne (Excluding VAT) R310.50 per tonne (Including VAT)

The storage tariff shall be payable on a monthly basis, unless prior financing arrangements have been made with Senwes, in which case the sunflower shall be held as security. The cost of these tariff options shall be invoiced upon delivery or transfer of the sunflower to this option and shall be payable within 30 days of date invoice, after which interest at the current Absa Bank prime lending rate shall be charged from the date upon which the amount was payable until actual date of full payment.

In the case where sunflower that are transferred from first delivery to carry-over stock (deferred storage) are sold before or on 31 October 2024, the accrued storage is billed by Senwes as at the date of the transaction (as detailed in the rates below) and is payable before the sunflower are outloaded or a silo certificate as requested by the customer is issued and delivered.

Product	Date of transfer
Sunflower	1 March 2024

All carry-over sunflower held by virtue of silo certificates (SAFEX or Senwes) shall be stored at the applicable tariff.

6. DRYING COSTS

- 6.1 Sunflower which is not dried artificially shall be taken in at a maximum moisture content of 10%. The delivered sunflower mass shall be decreased to a moisture content of 9% upon delivery by making use of the standard moisture formula (see paragraph 8.2).
- 6.2 Senwes shall, from time to time and at its discretion, accept sunflower with a higher moisture percentage at **silos where drying and aeration facilities are available**. The sunflower will then be dried at the cost of the client, subject to the applicable mass adjustment for surplus moisture.
- 6.3 Moisture percentages of sunflower shall be determined by means of an industry acceptable standard moisture meter, calibrated according to the prescriptions and procedures of the manufacturer.
- 6.4 Comprehensive information regarding the availability of and requirements in respect of the drying facilities is available at the silo.
- 6.5 **Senwes reserves the right to stop the receipt of wet sunflower should there be a surplus supply of wet sunflower and/or should drying capacity be insufficient.**
- 6.6 The availability of sunflower drying facilities will be determined by the availability of capacity. Contact your Silo Manager regarding the availability of this service.
- 6.7 The drying tariffs are as follows (1 March 2024 to 28 February 2025):

	Sunflower	
Percentage moisture	R per Tonne	R per Tonne
	Exl VAT	Including VAT
10,1 – 11,0	R61.17	R70.34
11,1 – 12,0	R80.92	R93.06
12,1 – 12,5*	R103.93	R119.52

***12.1% to 12.5% moisture receipts will only be allowed in exceptional cases with the necessary permission from Senwes Grain Management.**

***All sunflower with a moisture content of more than 10.0% to be dried may only be withdrawn 15 working days after delivery if sufficiently dry sunflower is available.**

7. REMOVAL OF HARMFUL SEEDS

In order to assist the client with the cleaning of consignments, Senwes renders such a service at a tariff where facilities are available, **at the discretion of the silo manager**, at the published tariff.

The removal of such seeds is a time-consuming action performed at high cost and risk.

- **Screenings not returned to the client:**

The cleaning tariff is charged and a mass-adjustment is made, as indicated below. **All material** below the 4,75mm round grid **plus** the **foreign material above the 4,75mm round grid, as well as sclerotinia**, shall be used in calculating the mass-adjustment percentage.

Sunflower		
No. of seeds per 1kg	R per Tonne	
	Excluding VAT	Including VAT
2 – 20	R 72.89	R 83.82
21 – 30	R155.13	R178.40
31 - 40	R308.39	R354.65
➤ 40	R461.65	R530.89

8. SUNFLOWER RECEIVED

8.1 Physical losses

As the customer delivers a product on a clean basis, Senwes will further make the below mentioned deductions from the gross mass of the delivered product after the moisture adjustment has been done. This will establish the net mass that may eventually be withdrawn again by the customer, namely actual percentage of foreign matter, screenings and sclerotinia, with 0.5% physical loss deduction.

Criteria for physical loss deduction:

- If the total deviations * are more than 4%, 0.5% deduction takes place on gross mass delivered.
- If the total deviations * are less than 4%, 0.3% deduction takes place on gross mass delivered.

* Please note that the physical loss deduction will only be a one-time deduction depending on which one of the criteria will be the highest. In other words, if there is an excess of any of the maximum limits set out at any of the above, regardless of whether any or all of the other limits would be within limits, there will be a 0.5% deduction. If in any of the above cases there was an excess where 0.5% would be deducted, the deduction will not be repeated. 0.5% is therefore only deducted once, regardless of whether there was an excess at more than one of the criteria.

8.2 Excess moisture

The delivered sunflower mass shall be decreased **at delivery** to the moisture percentages indicated below by making use of the standard moisture formula.

Product	Moisture %
Sunflower	9,0% (10% considered dry with deductions to 9.0%) during receipt

The formula for the calculations the adjustments is as follow:

Gross Mass X $\frac{100 - \text{Actual moisture content}}{100 - \text{Legally prescribed moisture content of type of grain (As set out below. Should the legally prescribed moisture content be changed at any stage, the legally prescribed moisture content set out below will be adjusted accordingly)}}$

9. SUNFLOWER COST ACCOUNTS AND INTEREST

- 9.1. All silo costs are payable within 30 days of date of invoice or as agreed with Senwes. Should the client neglect to make timeous payment, interest shall be levied on outstanding amounts, calculated daily and compounded monthly. Interest shall be calculated at the current Absa Bank prime lending rate as calculated from time to time. Interest will be charged from the date on which the amount was payable until the date of full payment.
- 9.2. A certificate signed by a manager or assistant manager of ABSA (whose appointment and office need not be proved), in which the aforementioned prime lending rate / rates are set out, will on mere submission thereof, serve as prima facie proof of the contents of it.
- 9.3. The withdrawal and transfer of sunflower from client storage shall only be allowed and Silo and Safex certificates shall only be issued once the account has been paid in full. However, Senwes may allow such withdrawal or issuing of certificates at its discretion should sufficient sunflower remain as retention stock to serve as security for the outstanding account.

10. SUNDRY TARIFFS

Sundry tariffs are regarded as being supportive to Senwes sunflower services and are offered where equipment is available and not occupied. The following tariffs shall apply in respect of sundry Senwes (Grainlink) Silo Operations facilities from 1 May 2023 to 30 April 2024.

10.1 Weighing (Excluding VAT)

- 10.1.1. Clients wishing to determine the mass of a consignment not to be offloaded shall pay R6.11 per tonne (Excluding VAT) and R7.03 per tonne (Including VAT) on the total mass of the consignment for the use of the mass meter, subjected to a minimum amount of R79.27 (Excluding VAT) and R91.16 (Including VAT) per consignment.
- 10.1.2. Clients and private organisations without client numbers must pay for the service in cash upon rendering of the service.
- 10.1.3. Senwes shall accept no legal liability for the accuracy of the mass of such goods being weighed.
- 10.1.4. Senwes shall not grade a consignment of sunflower to be weighed but not offloaded at the relevant Senwes silo.

10.2 Bagging costs

Costs relating to the bagging of sunflower amount to R160.29 per tonne (Excluding VAT) and R184.33 per tonne (Including VAT) and clients must provide their own bags and bagging contractor. This service shall be available at the discretion of the manager, only where the necessary facilities and equipment are available.

10.3 Outloading of sunflower

Any client who wishes to outload sunflower must give Senwes at **least 10 working days'** notice (subject to clause 6.7) of his intention to withdraw sunflower. No sunflower may be outloaded without the permission of Senwes.

However, Senwes will not incur any liability if it is unable to outload on the agreed date of out loading, and such inability to outload arises due to circumstances beyond Senwes control.

11. ADMINISTRATIVE TARIFFS

DEFINITIONS

"Facilitation" is when Senwes does the administration on behalf of the buyer of the sunflower.

"Stock transfer" is when the stock of one person/client/entity is transferred to another party.

"Standard delivery information" contains, inter alia, information such as the date of delivery, type of sunflower, vehicle registration number and net mass.

"Dispatching" is any form of transport used to transport the product from one point to another.

"Buyers" are individuals and/or entities buying sunflower.

"Producers" are individuals and/or entities producing sunflower.

11.1. DIRECT RECEIPTS/DELIVERIES AT SILOS FOR BUYERS FROM OTHER PRODUCERS

Can be done in two ways, namely facilitation and / or direct receipts on folio numbers.

11.1.1 DIRECT RECEIPTS

Transactions will be done as follows:

- a. Before sunflower can be received at a silo, the client wishing to deliver sunflower on his folio has to contact head office to ensure that a folio number is available for the receipt of sunflower. A folio number will start with "52*****" or "4*****".
- b. Should a client number not be available, it would have to be created at Senwes Central Administration after signature of all applicable documentation and application forms. Contact your sunflower procurer or silo manager.
- c. The client, as referred to in the letter referred to above, shall pay a handling tariff per Tonne which shall, inter alia, make provision for limited standard delivery information being made available to the client upon request.

11.1.2. FACILITATION

- a. Facilitation costs will be as follows:
 - a. R8.32 per tonne (Excluding VAT) and R9.57 per tonne (Including VAT) from announcement of tariff up to and including 50 000 tonne.
 - b. R6.66 per tonne (Excluding VAT) and R7.65 per tonne (Including VAT) > 50 000 Tonnes up to 75 000 tonnes.
 - c. R5.63 per tonne (Excluding VAT) and R6.47 per tonne (Including VAT) > 75 000 Tonnes up to 100 000 tonnes.
 - d. R4.59 per tonne (Excluding VAT) and R5.28 per tonne (Including VAT) > 100 000 tonnes plus.
- b. The buyer is entitled to information relating to stock receipts, orders, dispatches and balances.
- c. Facilitation transactions are dealt with as follows:
 - Senwes opens a buyers' contract which enables the producer to deliver at the silo.
 - This buyers' contract is linked to a sales contract opened in the buyer's name.
 - As soon as deliveries take place, the producer will nominate the contract on which deliveries will take place. Should the producer indicate that delivery must take place on the facilitation contract the stock will convert from the buyer's contract to the sales contract.

11.1.2.1 NEW FACILITATION ON DEFERRED STORAGE

- a) Senwes decided to make a new option available for buyers to execute facilitation contracts. This option will enable the buyer to receive sunflower on deferred storage.
- b) The same procedures (see paragraph 2.3) will be followed. The difference will be that the buyer will decide when the sunflower should be converted to the day or year storage option.

When clients want to outload sunflower, Senwes must be notified so that the sunflower can be placed on the correct folio number and instructions can be issued. The buyer can make the daily deliveries against the client's stock, follow up and confirm on the Senwes Application ("app") "My Senwes".

- c) The drying and cleaning costs are then debited to the buyer's account.
- d) The buyer's contract will be opened on his delivery number, in other words, the number starting with '52 **** 'or '4 *****'.
- e) As soon as the sunflower is to be outloaded, the stock will be transferred to the, "53 ***** number.
- f) The day storage, handling, silo costs and administration costs are for the buyer's account.
- g) Please note that the invoice for the administration costs will only be given to the buyer at the end of the contract. The reason for this is to determine the actual Tonnage delivered.
- h) Senwes is not liable for any damage in cases where the producer decides not to deliver his sunflower on the facilitation contract.
- i) Senwes is not the agent or representative of the client.

- j) Senwes needs the following information if you would be interested in facilitation transactions:
1. Silo where delivery will take place.
 2. The type of sunflower that will be delivered.
 3. The producer's name and delivery number.
 4. The tonnages to be delivered.

11.3.1 STOCK BALANCES AND DISPATCH INFORMATION IN RESPECT OF SILO CERTIFICATES /STOCK TRANSFERS FROM ONE CLIENT TO ANOTHER

Detail information regarding stock balances and/or dispatches shall be available once a month upon request.

11.4.1 STOCK TRANSFERS AND CONSOLIDATION OF STOCK

- Should a small quantity of stock of the buyer remain on a contract, Senwes may consider buying it at an agreed price.
- Transfer costs of stock from one client to another amount to R7.66 per tonne (Excluding VAT) and R8.81 per tonne (Including VAT), subject to a minimum of R134.34 per tonne (Excluding VAT) and R154.49 per tonne (Including VAT) per transaction and a maximum of R1,248.85 (Excluding VAT) and R1,436.18 (Including VAT). The contract number, buyer code, tonnage and silo must be indicated with such a request. Both parties must give permission for the transfer and must indicate which party will accept responsibility for the transfer costs. Documentation for this purpose is available at your nearest silo.

Stock balances and/or dispatch information is available as described in point 2.

11.5.1 ELECTRONIC SILO CERTIFICATES

- Cost of issuing an Electronic Silo Certificate (ESC) amounts to:
 - R4.75 per tonne (Excluding VAT) and R5.46 per tonne (Including VAT) per Tonne limited to a minimum of R104.09 (Excluding VAT) and R119.70 (Including VAT) per silo certificate;
 - ESC transaction costs as determined by ESC from time to time.
- Senwes Electronic Silo Certificates offer the following benefits, without guaranteeing such benefits:
 - Transfer of ownership will take place in a safe environment;
 - Increased efficiency by means of improved controls, the elimination of the dispatch of silo certificates to clients as well as the cancellation of certificates;
 - The risk of fraud is decreased;
 - Real-time information is available;
 - The Electronic Silo Certificate register facilitates record-keeping for clients and could even replace existing record-keeping systems of clients;
 - The system is available to silo owners and all parties making use of silo certificates, including brokers, traders and processors;
 - Costs relating to Senwes Electronic Silo Certificates: the producer/client is responsible for normal silo costs in respect of handling and storage;
 - Clients must register their unique pin numbers with ESC;
 - Visit www.silocert.co.za for registration and further training.

11.6.1 DISPATCH ARRANGEMENTS

Please note: Out loading will take place strictly on the basis of pre-bookings. Should bookings not be made by buyers or should transporters not arrive at the booked times, the instruction involved will either not be dealt with or will only be dealt with after other bookings. Please make sure that your transporter is aware of these arrangements in order to avoid any inconvenience and further costs.

- The following information is required when sunflower is outloaded and/or ordered:
 - Buyer code, contract number and silo where sunflower is to be loaded.
 - Tonnage and grade.
 - Date of intended out loading.
 - Transporter's details. Fax transporter's particulars (name, vehicle registration number and identity number of driver) to head office and relevant silo.
 - Rail transport: Siding line number and Spoornet account number.
 - Complete and lodge withdrawal document.
- The above particulars must be sent to Corne Olivier or she can be contacted at (018) 464 7226. E-mail: senwesgrainstock@senwes.co.za.

- An out loading instruction number will be provided, after which the appropriate arrangements for out loading of the product must be made at a suitable silo.
- Where orders are executed by rail, the pre-planning required by Transnet must be considered.
- Loading arrangements must be made with the silo involved at **least 10 (ten) working days** in advance. No out loading arrangements will be made at a silo should the instruction number not be provided in writing. An out loading instruction number does not mean that the transporter can arrive at the silo to outload without prior arrangements with the silo as far as out loading times and dates are concerned. Senwes shall, however, accept no liability should it be unable to outload on the agreed date of out loading and should such inability to outload be due to circumstances beyond Senwes control.
- Any changes to instructions must be made at Senwes (Grainlink- Dispatch Division), Corne Olivier (018) 464 7226.
- Should it happen that Senwes is unable to outload a specific grain or grade at a relevant operating silo due to operational circumstances, Senwes will be entitled to make the grain of grade available at an alternative operating silo where the grain type of grade is available, which will place the customer in the same position as the initial operating silo, as defined in the JSE directives.
- If grain is fumigated at an operating silo, Senwes will notify the market of fumigation and in this case will not be obliged to have the grain in question outloaded at an alternative operating silo, as well as in the case of a breakage or health risks where the out loading of grain can be stopped immediately.
- Senwes intends to publish the specific grade that the customer to which he is entitled to withdraw according to the grading regulations as published in the Government Gazette. Should the customer request specific grading results of additional testing on the specific grain type or grade, it will be referred to an independent accredited institution at the customers' own expense, provided that Senwes official indemnity documents have been signed. Any requests regarding grain quality can be sent by email to grainquality@senwes.co.za.
- No claims for weight shortfalls will be considered when sunflower transported by road is taken in at silos.
- All instructions / contracts issued on an ex-silo basis will not be reimbursed by Senwes for the transport costs if a grading dispute is declared, as well as in cases where customers would use external or third-party grading agents during out loading. Also note that no external grader or third-party grader will be allowed to make operational decisions during out loading of grain at Senwes operating silos.
- During shipments of sunflower, 10% moisture is considered as basis and no adjustment is made for moisture below 10%.
- Should vehicles be accidentally overloaded, the driver of the vehicle will be requested to offload a suitable quantity. No vehicles will be overloaded – a vehicle will only be loaded to its legal carrying capacity.
- Where silo certificates of stock transfers between clients are involved, only the dispatch documentation accompanying the vehicle or train truck will be issued.
- Should an instruction in terms of which no sunflower has been outloaded as yet, be changed on request of the client, such an amendment will be done free of charge. Should sunflower already have been outloaded in terms of the instruction and a change is requested, the costs relating thereto will be R5.47 per tonne (Excluding VAT) and R6.29 per tonne (Including VAT) subjected to a minimum amount of R104.09 per tonne (Excluding VAT) and R119.70 (Including VAT).
- Should a consignment be loaded in terms of an instruction and should a request be received for the cancellation of the instruction, the handling fees will be payable.
- If permission is requested to load after hours, the request must already be sent 5 working days in advance to the regional managers of the relevant silo for approval. If approved, the client will be notified by phone or email. There is no obligation to Senwes Grainlink to approve after hours loading. The client must confirm in writing / by email that the client is prepared to accept the after-hours loading rate of R19.40 per tonne (Excluding VAT) and R22.31 (Including VAT) for maize, grain sorghum and sunflower rate will be R38.80 per tonne (Excluding VAT) and R44.62 (Including VAT).

12. POWER INTERRUPTIONS AND GENERATORS

- The following only applies to Senwes silos that are equipped with generators that are able to handle the electric charge of the relevant silo. Load shedding is a reality that has a significant effect on the industry as well as the overall economy. Until now, Senwes has been able to accommodate customers by using generators at some of our silos.

- However, some of the Senwes silos are further affected by the municipalities that are currently experiencing serious problems with their electricity distribution.
- Senwes has no control over the above and this affects the operational activities of the silo. However, this places a very high cost on Senwes to continuously use generators and Senwes was forced to put the following arrangement in place and will adjust the cost yearly.
- The cost of unloading grain using a generator is R47.19 per tonne. Senwes Grainlink is prepared to contribute R31.46 per tonne to the cost. If the buyer / owner of the grain is willing to pay the additional R15.73 per tonne (Excluding VAT) for the use of a generator, Senwes Grainlink can provide out loading services during power outages. After hour tariffs will also apply if grain are loaded after hours. These tariffs will change on 1 May 2024.
- This is a voluntary participation and if a customer does not want to use the option, the customer's loading slot will move until the power failure is lifted.
- No loads will be unloaded during a power outage utilising a generator unless the grain owner has given written permission to do so and has sent or delivered such permission to the silo in question.
- The grain owner will be billed with the generator tariff (where applicable), which is payable within 30 days after the date of invoice.
- If the grain is loaded with the help of a generator, the tariffs and conditions will be applicable for after-hours loading as well.
- Senwes reserves the right to decide if a generator will be used or not.

13. DISPUTE PROCEDURES

All disputes have to be send to ListSenwesGrainDisputes@senwes.co.za. The purpose of this procedure is to assist the buyer to follow the correct steps in respect of a dispute, which will ensure the recovery of his cost in the event of the dispute being successful. A Double Tube Probe will be used for sampling a disputed shipment.

GRADING DISPUTES

A Dispute must be declared per shipment (1 wagon or 1 truck load) and will be dealt with accordingly.

- All disputes must be declared telephonically with the Dispute Officer at Senwes Head Office. Telephonic disputes must be followed up in writing for registration.
- Disputes have to be lodged in writing on the prescribed dispute form (available from the Dispute Clerk) by the client (the contracting party with Senwes). Only registered disputes will be considered.
- The dispute commences on receipt of a completed written dispute declaration accompanied by a completed written grading report. (E-mail)
- Sampling and grading must be conducted in accordance with the regulations for the specific commodity as set out in the applicable Government Gazette, and must be conducted by a qualified grader with the necessary grading certificates in respect of the specific commodity.
- Should an arbitrator investigate the dispute (shipment), the prescribed grading equipment must be available and in working order. If the grading equipment is not available, the Senwes original grading will be accepted as per despatch document.
- Should a consignment (shipment) be offloaded before registration and acceptance thereof, no dispute or liability will vest and the Senwes grading will be accepted as final and correct.
- No dispute can be declared in respect of consignment in respect of which the buyer gave permission for the blending of different grades of commodity.
- Should the buyer - whom has bought the commodity from Senwes - not be the party who raises the dispute (ex buyer has resold, or has transferred ownership of the commodity to a third party – “third party”), Senwes reserves the right to negotiate with the third party in order to resolve the dispute.

MASS DISPUTES

- Weight determination is done on Senwes calibrated and verified weighbridges and is final as loaded and accepted by the transporter. Should the recipient be of the opinion that a physical loss occurred during transit, the loss must be recovered from the transporter involved.

ARBITRATOR

- Senwes can insist on the appointment of an unbiased arbitrator to investigate a disputed Senwes consignment before finalisation of any decisions. The specific Arbitrator and arbitration costs must be agreed to and finalised (in writing) upon registration of the dispute, failing which shall absolve Senwes from any related costs.

- Senwes will only be liable for the costs of the arbitrator if the same was agreed to on the basis set out above.

TRANSPORT

- Demurrage cost claims do not apply to public holidays and weekends.

RAIL TRANSPORT

- 24 hours are allowed during which a dispute may be resolved during, and for which period no costs may be claimed. (Transport costs, demurrage costs and grading costs)
- Consignments which are transported by rail and en route for longer than 2 weeks (10 days) will not qualify for insect infestation claims.

ROAD TRANSPORT

- Transport costs resulting from disputes are dealt with separately from grading disputes.
- Should a dispute be resolved in favour of the buyer, transport tariffs for return freights must be negotiated and confirmed between Senwes and the Transporter. Senwes will only negotiate for a market related Transport tariff.
- During normal working hours (07h00 – 17h00 weekdays excluding Saturdays, Sundays and Public holidays), three (3) hours are allowed during which a dispute may be resolved before any costs may be recovered.
- Consignments must be transported within reasonable time taking into consideration the distance between loading (dispatching) point and offloading point. In the event that a load cannot be delivered to its destination within a reasonable time frame, it must be reported to the dispute office. Should the above not be adhered to, the consignment will be the responsibility of the buyer and no dispute can be declared.

14. FOOD SAFETY: FOOD HYGIENE

14.1. Trucks, tractors and wagons will be inspected during deliveries to ensure that there is no glass, oil, diesel, radiator water, pieces of metal, etcetera in the sunflower. Tarpaulins used must also be clean and insect free.

14.2. The client (producer or supplier) shall ensure and guarantee that:

- The sunflower is suitable for human and animal consumption
- All chemical substances comply with the Fertilisers, Farm Feeds, Agricultural Remedies and Stock Remedies Act 36 of 1947 and the Agricultural Product Standards Act 119 of 1990, or any applicable legislation and that records are kept of all chemical applications to the product being delivered.
- The product is not contaminated by any harmful toxins or any poisonous substances which are harmful or dangerous for human and animal consumption.

14.3. Chemical declaration by client

- Clients must acquaint themselves with the legal requirements in respect of chemical substances and must comply with the standards as contained therein. Clients shall be obliged to submit a declaration to the Senwes silo with each delivery instruction, in which it is declared that they:
 - Complied with the requirements.
 - Did not apply illegal substances and/or
 - Incorrect dosages or
 - Applied legal substances at incorrect times.
- Please see Annexure 1 for correct wording.
- Should the client neglect to complete the Chemical Declaration, it will be accepted that the above requirements have been met.
- The wording of the Chemical Declaration can be found on the grain delivery instruction and signature of the grain delivery instruction also serves as confirmation of the Chemical Declaration.

14.4. Senwes shall, at any time at its discretion, be entitled to investigate compliance with these requirements and to take samples for analysis. Senwes retains the right to refuse consignments should there be any suspicion of non-compliance with regulations and/or legislation.

15. BLENDING OF SUNFLOWER

Senwes stores sunflower of the same type and quality in bulk in such a manner as to ensure that blending of the same type and quality will take place. Clients storing sunflower at Senwes may only insist on the same type and quality of sunflower as described in the appropriate grading regulation and may only withdraw or market sunflower of a similar quality. Senwes reserves the right to return sunflower of a similar or better quality.

16. SUNFLOWER DELIVERY INSTRUCTION

16.1. No sunflower shall be received without a grain delivery instruction, duly completed and signed by the client.

16.2. Silo personnel may not sign a delivery instruction on behalf of the client.

16.3. Clients may not indicate an offer to sell sunflower or any requests in this regard on the delivery instruction and Senwes will take no note of such requests. Should clients wish to sell their sunflower to Senwes, the Senwes procurers must be contacted in this regard.

Should you require any further information, kindly contact Heinrich Henning, Manager: Operations, at (018) 464-7396.

**HEINRICH HENNING
MANAGER: OPERATIONS**

The chemical declaration is done per delivery and is printed on the reverse of the DELIVERY INSTRUCTION for the convenience of the producer.

The wording is indicated in the attached ANNEXURE 1.

CHEMICAL DECLARATION

Annexure 1

I, the undersigned,

Initials and surname: _____

Name of farm: _____

Postal address: _____

Client no.: _____

who is of the intention to deliver sunflower at the following Senwes silos:

hereby note the application of ***chemical substances and limitations in respect thereof***, as contained in the Fertilisers, Farm Feeds, Agricultural Remedies and Stock Remedies Act 36 of 1947 or any other applicable legislation.

I am aware of the fact that:

1. Legal requirements apply in respect of the use of certain herbicides, insecticides and various other agricultural chemicals and the residue levels of the relevant products which may be available in the product and which may be applied.
2. I have to acquaint myself with the legal requirements and that I have to comply with the standards as set out therein.
3. I am obliged to submit this declaration of compliance to Senwes before any deliveries may be made and I hereby declare that I have complied with the regulations and that I have not applied any illegal substances and/or incorrect dosages and that I have not applied legal substances at incorrect times.
4. Senwes shall be entitled to investigate compliance with these requirements and take samples for analysis at any time and at its discretion.
5. Grain which does not comply with the requirements shall not be accepted and force majeure shall not apply in respect thereof.
